

VOLTAGE REGULATOR DIODES

Silicon diodes in a DO-15 plastic envelope intended for general purpose use as low power voltage regulators.

The series consists of 26 types with nominal zener voltages ranging from 7.5 V to 75 V with a tolerance of $\pm 5\%$.

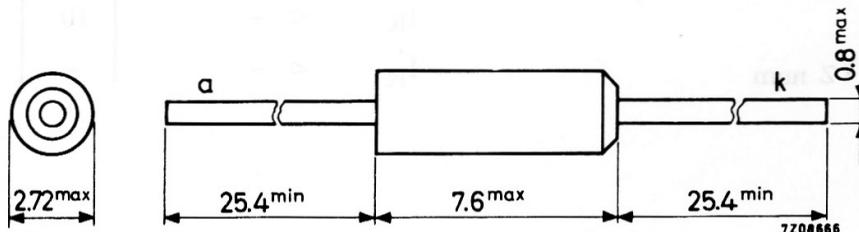

QUICK REFERENCE DATA

Zener voltage range		nom.	7.5 to 75	V
Zener voltage tolerance			± 5	%
Peak zener current	I _{ZM}	max.	3	A
Total power dissipation up to T _{amb} = 25 °C	P _{tot}	max.	1	W
Junction temperature	T _j	max.	175	°C
Thermal resistance from junction to ambient	R _{th j-a}	=	0.15	°C/mW

**SOLDERING AND MOUNTING NOTES**

1. Soldered joints must be at least 5 mm from the seal.
2. The maximum permissible temperature of the soldering iron or bath is 245°C; it must be in contact with the joint for no more than 5 seconds.
3. Avoid hot spots due to handling or mounting; the body of the device must not come into contact with or be exposed to a temperature higher than 175°C.
